THE HARRIS PRODUCTS GROUP

The Harris Products Group was formed by combining two strong names in the welding business - Harris Calorific and J.W. Harris. The Harris Products Group is

a world leader in metalworking products used in the brazing, soldering, welding, cutting and gas distribution industries. The combined company offers excellence in the manufacture of:

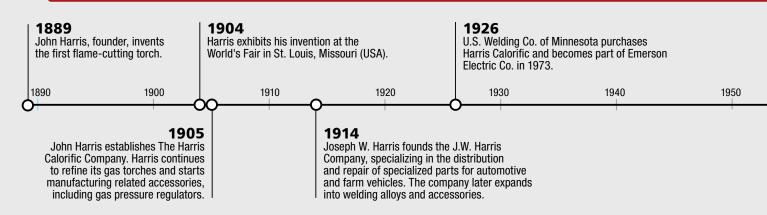

- Gas welding and cutting equipment
- Industrial and specialty gas regulation equipment
- Gas distribution systems

- Brazing and soldering alloys
- Welding alloys •
- Pre-formed bends, rings and return bends

The Harris Products Group is a wholly-owned subsidiary of The Lincoln Electric Company. Lincoln THE WELDING EXPERTS® Electric has 63 manufacturing locations, including operations and joint ventures in 23 countries, and a worldwide network of distributors and sales offices reaching over 160 countries.

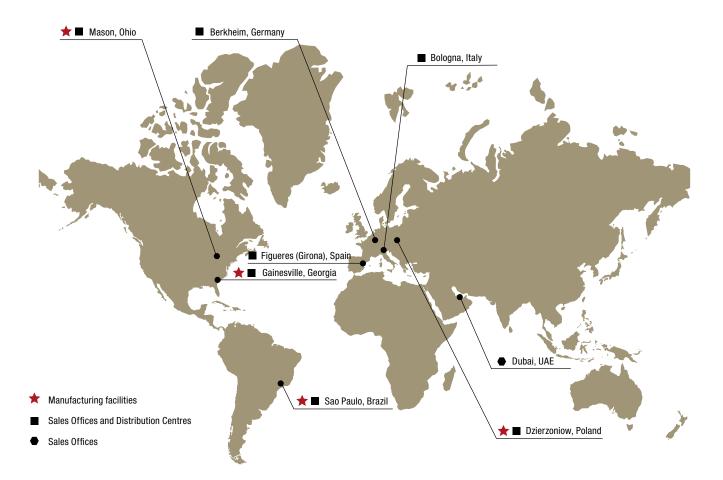

THE HARRIS PRODUCTS GROUP HISTORY

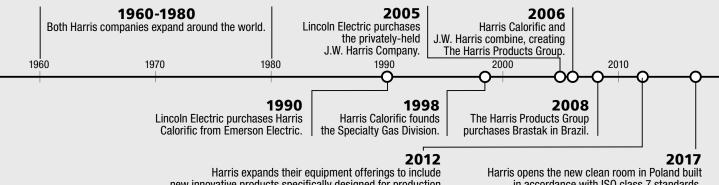

MANUFACTURING FACILITIES

Based in Mason, Ohio, The Harris Products Group has four manufacturing locations in three countries and a worldwide network of distributors and sales offices covering more than 90 countries.

Harris expands their equipment offerings to include new innovative products specifically designed for production brazing including new Perfect Flame[™] technology. Harris introduces the 7-Year Warranty Plan.

Harris opens the new clean room in Poland built in accordance with ISO class 7 standards. International launch of the new Specialty Gases equipment range.

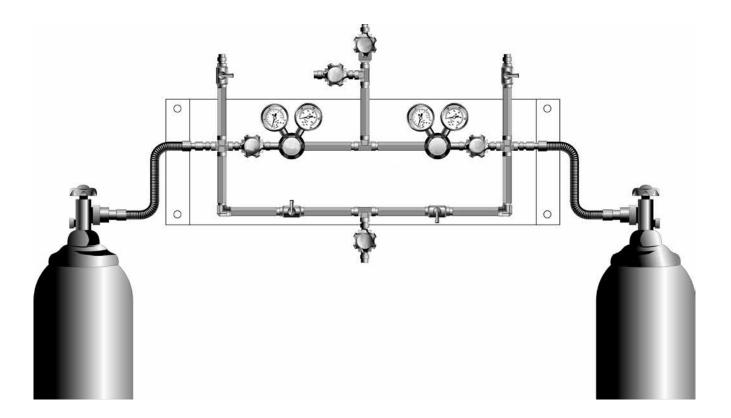

GAS DELIVERY SYSTEMS

WHEN GASES ARE USED IN SIGNIFICANT VOLUMES, A CENTRALIZED GAS DELIVERY SYSTEM IS A PRACTICAL NECESSITY. A WELL-CONCEIVED DELIVERY SYSTEM WILL REDUCE OPERATING COSTS, INCREASE PRODUCTIVITY AND ENHANCE SAFETY.

A centralized system will allow the consolidation of all cylinders into one storage location. With all the cylinders in one place, inventory control will be streamlined and cylinder handling will be simplified and improved. Gases can be separated by type to enhance safety.

With gas delivery systems the frequency of cylinder changeouts are reduced. This reduction is achieved by connecting multiple cylinders to supply panels in banks in such a way that one bank can be safely vented, replenished and purged while a second bank provides continuous gas service. This type of system can supply gas to multiple applications and even entire facilities, eliminating the need for separate cylinders and regulators for each point of use.

Since cylinder switchover can be accomplished automatically by the supply panel, cylinders in a bank will be uniformly exhausted, resulting in improved gas utilization and lower costs. The integrity of the delivery system will be better protected since cylinder change-outs will be done in an isolated, controlled environment.

GAS CONTROL SYSTEMS

LET THE EXPERTS AT HARRIS SHOW YOU HOW YOU CAN RAISE PRODUCTIVITY, LOWER OPERATIONAL COST, AND IMPROVE THE QUALITY OF YOUR PRODUCTS BY CHOOSING THE RIGHT GASES AND EQUIPMENT FOR YOUR SPECIFIC APPLICATION. WHETHER YOU ARE WORKING WITH OXYGEN, HYDROGEN, NITROGEN, OR ANY OF THE FUEL GASES, HARRIS OFFERS A COMPLETE LINE OF GAS CONTROL SYSTEMS COUPLED WITH EXPERIENCED ENGINEERS AND TECHNICAL SPECIALIST THAT ARE READY TO ASSIST YOU FROM THE GAS SUPPLY TO THE FLAME.

GAS SUPPLY MANIFOLDS for oxygen and propane, hydrogen, methane and inert gases

One-side manifolds provide continuous gas flow from a single cylinder or bank of cylinders. Designed for applications where a slight rise in delivery pressure from full to empty cylinder can be tolerated or as a first stage of pressure reduction. Manual adjustment of the regulator allows the user to set downstream pressure. It features modular shut-off diaphragm valve with one inlet for a cylinder / bank of cylinders (1x1) or two inlets to connect one more gas source (1x2).

FEATURES:

- Model H25 regulator:
 - designed according to ISO 7291 standard
 - stainless steel diaphragm
 - high pressure capsule seat with Kel-F (CTFE) sealing surface
 - sintered bronze filter 25 micron
 - stainless steel T-screw handle
 - internal or external safety relief valve

IN max Out:

285

- 7 year warranty
- Up to 300 bar inlet pressure

≫

- 100% tested at nominal pressure
- Compact design

TWO-SIDE GAS SUPPLY MANIFOLDS

TWO-SIDE GAS SUPPLY MANIFOLDS for oxygen and propane, hydrogen, methane and inert gases

Two-side manifolds provide continuous gas flow from a single cylinder or bank of cylinders. Designed for applications where a slight rise in delivery pressure from full to empty cylinder can be tolerated or as a first stage of pressure reduction. Manual adjustment of the regulator allows the user to set downstream pressure. It features modular shut-off diaphragm valve with one inlet on both sides for a cylinder / bank of cylinders (2x1) or two inlets on both sides to connect four gas sources (2x2). Both sides can be used at the same time or a manual switchover is possible.

FEATURES:

- Model H25 regulator:
 - designed according to ISO 7291 standard
 - stainless steel diaphragm
 - high pressure capsule seat with Kel-F (CTFE) sealing surface

SWITCHOVER GAS SUPPLY MANIFOLD

SWITCHOVER GAS SUPPLY MANIFOLD for oxygen, hydrogen and inert gases

Semi-automatic switchover manifolds prevent downtime by automatically switching gas supply from the primary cylinder bank to the reserve cylinder. The user resets the primary bank by turning the knob. Designed for applications where continuous flow of a gas is critical and pressure differential of outlet pressure is tolerated or as a first stage of pressure reduction.

It features modular shut-off diaphragm valve with one inlet on both sides for a cylinder / bank of cylinders and shutoff ball valve on low pressure side to allow maintenance without shutdown.

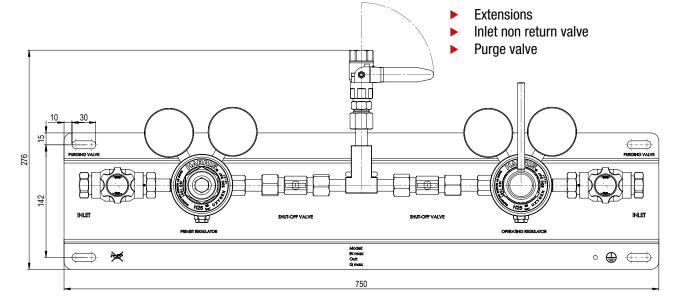

FEATURES:

- Model H25 regulator:
 - designed according to ISO 7291 standard
 - stainless steel diaphragm
 - high pressure capsule seat with Kel-F (CTFE) sealing surface
 - sintered bronze filter 25 micron
 - stainless steel T-screw handle
 - internal or external safety relief valve
 - factory pre-set outlet pressure
 - 7 year warranty
- Up to 300 bar inlet pressure
- 100% tested at nominal pressure
- Compact design

- "Plug and go" delivered ready to use
- Easy to extend just add modular extensions
- Main ball shut-off valve 1/2"
- All modular components fully tested for stability, functionality and gas tightness
- Quickly and easily replaceable pressure gauges
- Modular header valve with purge and non-return valve as an option
- Mounted on an electro and laser engraved stainless steel plate
- ▶ Working temperature from 20°C to + 60°C
- Inlet 1/4" NPT F
- Outlet G1/2"
- Weight: one inlet 7,6 kg

GAS SUPPLY MANIFOLD WITH AN INTEGRATED PRE-HEATER

GAS SUPPLY MANIFOLD designed to prevent the freezing up of the gas installation

This one-side gas supply manifold provides continuous gas flow from a single cylinder or bank of cylinders. It features an integrated pre-heater, which prevents the freezing up of the regulator. Designed for applications where a slight rise in delivery pressure from full to empty cylinder can be tolerated or as a first stage of pressure reduction.

FEATURES:

- Model H25 regulator:
 - designed according to ISO 7291 standard
 - stainless steel diaphragm
 - high pressure capsule seat with Kel-F (CTFE) sealing surface
 - sintered bronze filter 25 micron
 - stainless steel T-screw handle
 - internal or external safety relief valve
 - 7 year warranty
- Pre-heater:
 - model 500 W
 - for all gases needed to warm up (e.g. CO₂, O₂, mix argon / CO₂, N₂O)
 - do not recommended for corrosive and flammable gases
 - stabilized temperature up to 15 m³/h continuous CO₂ flow
 - insulation IP 64 (EN 60529)
 - voltage: 230 V
 - 1 meters long power cable without plug

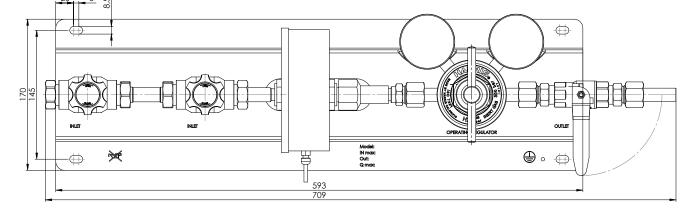

Manual adjustment of the regulator allows the user to set downstream pressure. It features modular shut-off diaphragm valve with one inlet for a cylinder / bank of cylinders (1x1) and 500 W pre-heater for all gases needed to warm-up (corrosive and flammable gases excluded).

- Up to 300 bar inlet pressure
- 100% tested at nominal pressure
- Compact design "Plug and go" delivered ready to use
- Easy to extend just add modular extensions
- Main ball shut-off valve 1/2"
- All modular components fully tested for stability, functionality and gas tightness
- Quickly and easily replaceable pressure gauges
- Modular header valve with purge and non-return valve as an option

GAS SUPPLY MANIFOLDS designed for acetylene

This special line of industrial manifolds is dedicated to provide continuous acetylene flow from a single cylinder or bank of cylinders. Designed for applications where a slight rise in delivery pressure from full to empty cylinder can be tolerated or as a first stage of pressure reduction. Manual adjustment of the regulator allows the user to set downstream pressure.

The acetylene manifolds are design according to ISO 14114 standard and feature inlet high pressure ball valve for acetylene, an automatic quick-action shut-off unit (both according to EN ISO 15615), one flashback arrestor (according to DIN EN ISO 5175-1) and a pressure regulator model H25 (compliant with ISO 7191). They are equipped with a diaphragm shut-off valve for each inlet port (one for each cylinder to be connected).

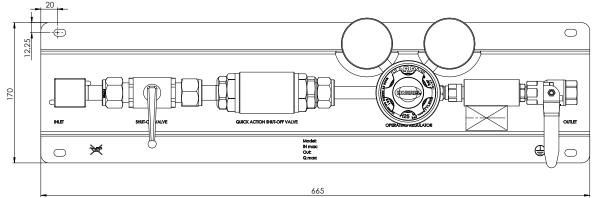

FEATURES:

- Model H25 regulator:
 - designed according to ISO 7291 standard
 - stainless steel diaphragm
 - high pressure capsule seat with Kel-F (CTFE) sealing surface
 - sintered bronze filter 25 micron
 - internal or external safety relief valve
 - 7 year warranty
- Automatic quick-action shut-off
- Flashback arrestor
- Up to 25 bar inlet pressure
- ▶ 100% tested at nominal pressure

HIGH FLOW GAS SUPPLY MANIFOLDS designed for acetylene

This special line of industrial manifolds is dedicated to provide continuous acetylene flow from a single cylinder or bank of cylinders. Designed for applications where a slight rise in delivery pressure from full to empty cylinder can be tolerated or as a first stage of pressure reduction. Manual adjustment of the regulator allows the user to set downstream pressure.

The high flow acetylene manifolds are design according to ISO 14114 standard and feature inlet high pressure ball valve for acetylene, an automatic guick-action shut-off unit (both according to EN ISO 15615), one flashback arrestor (according to DIN EN ISO 5175-1) and a pipeline regulator model H25 (compliant with ISO 7191). They are equipped with a diaphragm shut-off valve for each inlet port (one for each cylinder to be connected).

FEATURES:

- Model H25 regulator:
 - designed according to ISO 7291 standard
 - stainless steel diaphragm
 - high pressure capsule seat with Kel-F (CTFE) sealing surface
 - sintered bronze filter 25 micron
 - stainless steel T-screw handle

POINT-OF-USE

HARRIS POINT-OF-USE FEATURES:

- Compact design
- High operational reliability
- Designed for acetylene, oxygen and highly compressed non-corrosive gases
- ▶ Operating pressure: acetylene up to 2,5 bar; all other gases up to 60 bar
- Sintered filter at the inlet valve traps impurities and prevents penetration by dirt particles
- ► 7 year warranty for regulators

NOMINAL GAS FLOW:

- ► Acetylene up to 15 Nm³/h
- ▶ Propane up to 10 Nm³/h
- ► Oxygen up to 200 Nm³/h

COMPONENTS:

Connection body, ball valve, brazed nipple and union nut can be assembled corresponding to the type of gas.

ONE STATION POINT-OF-USE

FEATURES:

- ► Ball valve
- Brazed connection
- ► Connection thread 3/8" (F)
- Bracket and 1 pressure regulator included

EST0203	Oxygen - Propane	Ø 12 mm	846PR, 8460X
EST0204	Oxygen - Propane	Ø 12 mm	846PR, 8460X-4

Other options upon request.

POINT-OF-USE

MODEL SHOWN:

THREE STATIONS POINT-OF-USE

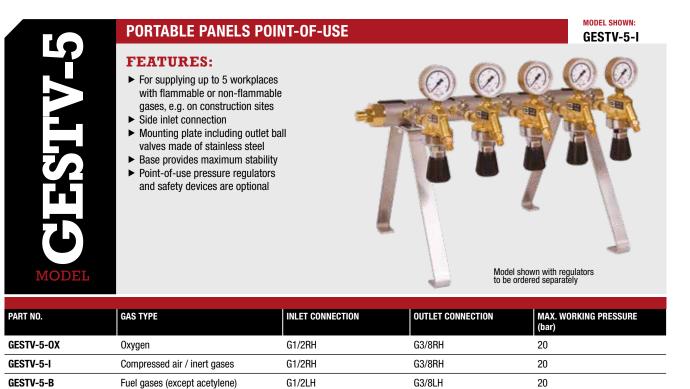

FEATURES:

- ► Ball valve
- Brazed connection
- ► Connection thread 3/8" (F)
- Bracket and 3 pressure regulators included

PART NO.	GAS TYPE	PIPELINE CONNECTION	REGULATOR
EST0301	Oxygen - Acetylene - Argon/CO $_2$	Ø 12 mm	8460X, 846AC, 846-30LM
EST0302	Oxygen - Acetylene - Argon/CO2	Ø 12 mm	8460X, 846AC, 846-30FLAR
EST0303	Oxygen - Propane - Argon/CO $_2$	Ø 12 mm	8460X, 846PR, 846-30LM
EST0304	Oxygen - Propane - Argon/CO $_2$	Ø 12 mm	8460X, 846PR, 846-30FLAR

Other options upon request.

POINT-OF-USE PRESSURE & FLOW REGULATORS

HIGH FLOW PIPELINE REGULATOR

MODEL SHOWN: H47AS-40

APPLICATIONS:

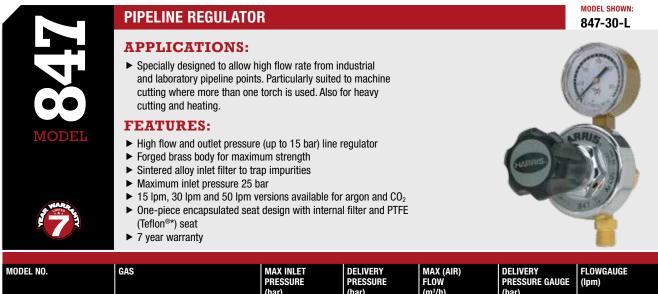

Designed for high flow requirement for feeding industrial gas pipelines for plasma and laser cutting

FEATURES:

- ► Maximum inlet pressure 60 bar
- Rear inlet connection
- ► Air flow over 370 m³/h
- Stainless steel diaphragm
- ► T- screw handle provides smooth turning action and long service life
- One-piece encapsulated seat design with internal filter and PTFE (Teflon®*) seat
- ► 7 year warranty

MODEL NO.	GAS	MAX INLET PRESSURE (bar)	DELIVERY PRESSURE (bar)	MAX (AIR) FLOW (m ³ /h)	DELIVERY PRESSURE GAUGE (bar)

* Teflon® is a registered trademark of The Chemours Company. **The regulator is available for all the listed gases. When ordering always specify gas.

POINT-OF-USE PRESSURE & FLOW REGULATORS

PIPELINE REGULATOR

APPLICATIONS:

Specially designed to allow high flow rate from industrial and laboratory pipeline points

FEATURES:

► High flow

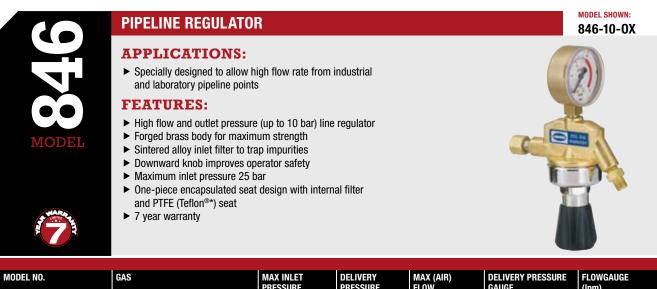

- Outlet pressure up to 10 bar
- Forged brass body for maximum strength
- ► Maximum inlet pressure 25 bar
- One-piece encapsulated seat design with internal filter and PTFE (Teflon®*) seat
- 7 year warranty

MODEL SHOWN:

EXTENSIONS

MODULAR EXTENSIONS

APPLICATIONS:

 Designed to increase the number of connected cylinders to supply panel

FEATURES:

- ► Max. inlet pressure 300 bar
- ► Modular design
- Diaphragm inlet shut off valve option
- ► Easy to install
- ► Two options: left or right

PART NO.	DESCRIPTION		MAX INLET PRESSURE (bar)
9110300	Header IMSEMR right	Non-corrosive	300
9110301	Header IMSEML left	Non-corrosive	300

ACCESSORIES

HIGH PRESSURE HOSES

► For connecting gas supply panels and gas cylinder

FEATURES:

- ► Two versions of hoses: stainless steel or PTFE
- ► High pressure: working pressure up to 300 bar (4350 psig)
- Length 1 m or 2 m
- ► Inner diameter 6 mm
- ► Elbow connection on cylinder side
- ► All hoses equipped with a stainless steel safety wires
- \blacktriangleright All types of couplings according to the customer's specification available
- ► Special requirements e.g. check valve for acetylene upon request

MODEL	MATERIAL	PRESSURE	(CYLINDER		OUTLET CONNECTION (MANIFOLD CONNECTION)		LENGTH	OPTIONS GAS TYPE		GAS TYPE

Example: IMS-FH-S - 300- D9-000-2M- SC- 1 - 0XYGEN

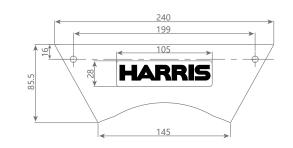

CYLINDER WALL BRACKET

DESCRIPTION:

- Special design for one cilinder
- ► Easy installation to a wall or construction
- Delivered with safety belt
- ABS material

PART NO.	DESCRIPTION	MATERIAL	
9009506	Cylinder wall bracket	ABS	

REGULATORS FLASHBACK ARRESTORS

FLASHBACK ARRESTORS

- Prevent reverse flow of gases with built-in check valve
- Extinguish flashback fire with sintered metal filter
- Thermal cut-off which positively shuts off the gas in case of hose fire, burn or repeated flashbacks (only "T" version)
- Pressure operated cut-off which positively shuts off the gas when outlet pressure exceeds inlet pressure (only "3T" version)
